1. INTRODUCTION:

OQ is a global integrated energy company rooted in Oman. It operates in 17 countries and covers the entire value chain from exploration and production to marketing and distribution of end-user products. Over 30 wide range of fuels and chemicals are sold in 80 countries worldwide. OQ provides a diversified range of petroleum products for domestic and international markets.

OQ Refineries and Petroleum Industries (OQ RPI) is a subsidiary of OQ in Oman that is responsible for refining crude oil and producing petrochemical products, supporting the country's downstream energy and industrial development.

The Scope of Work (SoW) applies to OQ RPI plants located in Suhar only.

2. PURPOSE:

The purpose of this Scope of Work (SoW) is for OQ RPI to engage a professional service provider to recycle, recover and/or reuse the oligomer waste stream in Oman in compliance with applicable regulations and industry best practices.

3. GENERATION FREQUENCY:

Waste name	On-site inventory (Ton)	Generation (Ton/year)	Containers
Oligomer	50	30	IBC tank or steel drums

Notes:

a) The generation estimates are based on historical data and are provided for guidance purposes only. These estimates do not constitute any commitment or obligation on OQ RPI. Actual quantities may vary significantly due to operational and maintenance factors during the contract period. The Contractor shall bear this risk and will invoice based on the actual quantities recycled in any given period, with no entitlement to additional claims arising from reliance on the provided estimates.

b) OQ RPI is not obligated to award the full scope of services to the Contractor and reserves the right to engage other parties to perform all or part of the required services under separate or partial call-off arrangements.

4. OLIGOMER WASTE BRIEF INFORMATION:

In Polymer Plant, oligomers are short-chain molecules that are formed as intermediates in the polymerization reaction. Oligomer is produced during the steaming treatment of polypropylene powder in a steamer and steamer scrubber system from the Polypropylene plant. The OQ RPI generated oligomer waste analysis report is given below:

Parameters	Method	UoM	Result
C5	ASTMD6730	% (vol)	Trace
C6-C9	ASTMD6730	% (vol)	19.37
C10-C11	ASTMD6730	% (vol)	58.50
C12+	ASTMD6730	% (vol)	21.94
Flash point	ASTMD 93	°C	56
Chloride	APHA 4500 Cl-B	mg/l	5.4
Chlorine	APHA 4500 Cl-G	mg/l	<0.02
Sulfur	ICP	mg/l	21
Mercury	GC-SOP-169	mg/l	<0.001

Note:

The analysis results are provided for guidance purposes only and are based on a representative sample available at the time of preparation. Actual composition may vary depending on plant operating conditions

5. GENERAL TERMS & CONDITIONS:

a) The Contractor shall ensure that recycling, recovery and/or reuse of oligomer waste streams is carried out within Oman.

b) The Contractor shall submit the following documents as part of the technical proposal:

   i. Details of the proposed recycling, recovery and/or reuse facility.

   ii. Valid approvals/permits from relevant authorities for recycling and/or recovery, transportation, and storage, where applicable.

   iii. A detailed recycling, recovery and/or reuse methodology.

   iv. Final recycling, recovery and/or beneficial use route of the oligomer waste.

   v. Key personnel CVs.

c) Detailed timeline from loading to final recycling, recovery and/or reuse process.

d) The Contractor may request on-site material inspection and sampling (maximum 250 g). Such inspection and sampling shall be conducted during the tendering phase and must be requested through the pre-bid clarification process via Tawreed.

e) OQ RPI reserves the right for two representatives to visit the proposed recycling, recovery and/or reuse facility during the bidding stage to assess the facility's capability. The visit shall be at OQ RPI's cost.

f) OQ RPI reserves the right to audit or visit the proposed recycling, recovery and/or reuse facility during the contract period to verify the recycling, recovery and/or reuse methodology and compliance with contractual requirements. If the audit findings are deemed unsatisfactory by OQ RPI, the purchase agreement may be terminated without liability to OQ RPI.

g) Contractor shall not subcontract any part of the services without prior written approval from OQ RPI and shall remain fully responsible for all subcontracted activities.

6. CONTRACTOR'S SCOPE OF WORK:

a) Contractor shall recycle, recover and/or reuse oligomer waste streams within Oman in compliance with all applicable local regulatory requirements, including but not limited to the requirements of the Environment Authority (EA) and the Civil Defence and Ambulance Authority (CDAA).

b) Contractor shall collect oligomer waste from OQ RPI's on-site storage facility within ten (10) working days of receiving written notification.

c) Contractor shall provide all manpower, transportation vehicles, tools, equipment, and other resources necessary to perform the services.

d) Where the Contractor requires the waste to be transferred, repackaged, or loaded into alternative containers, tanks, drums, or any other containment system, the Contractor shall provide all associated materials, equipment, and resources at its own cost.

e) Contractor shall deploy a competent and experienced supervisor to coordinate and oversee waste loading and transportation activities at OQ RPI on-site waste storage facility.

f) Contractor shall comply with all OQ RPI HSSE rules and regulations during executing the SoW activities.

g) Contractor shall provide adequate spill control equipment and cleaning materials and shall be responsible for the cleanup and proper disposal of any contaminated soil or materials resulting from its activities at OQ RPI's on-site waste storage facility.

h) Contractor shall assume full responsibility for the waste once it leaves OQ RPI premises. In the event of rejection at the final recycling, recovery and/or reuse facility, the Contractor shall bear all associated costs, including transportation, alternative recycling, recovery and/or reuse or disposal, and any legal or regulatory non-compliance.

i) Contractor shall be responsible for recycling, recovery and/or reuse the full quantity of waste specified in each call-off notification.

j) Contractor shall complete the recycling, recovery and/or reuse of oligomer waste within two (2) months from the date of loading (i.e., when the waste leaves OQ RPI premises).

k) Contractor shall ensure full traceability of the waste from collection at OQ RPI premises through transportation to final recycling, recovery and/or reuse. A complete audit trail shall be maintained, including waste movement documents, transport records, and final recycling, recovery and/or reuse certificates.

l) Contractor shall retain all records related to the collection, transportation, recycling, recovery and/or reuse of the waste for a minimum period of five (5) years following completion of the recycling, recovery and/or reuse activities. Such records shall be made available to OQ RPI upon request.

m) Contractor shall demonstrate the final use of the recycled, recovered and/or reused product and provide supporting evidence upon request.

n) Contractor shall submit all required records and reports to OQ RPI in accordance with the agreed schedule, including but not limited to waste movement documents, transport records, final recycling, recovery and/or reuse certificates, and any other documentation required to demonstrate completion of the services in alignment with regulatory requirements.

o) Contractor shall notify OQ RPI within twenty-four (24) hours of any incident occurring during transportation, recycling, recovery and/or reuse, treatment, or storage activities. A detailed incident investigation report shall be submitted within three (3) working days to OQ RPI.

7. OQ RPI SCOPE OF WORK:

a) OQ RPI shall issue the necessary gate passes to facilitate access to the site.

b) OQ RPI shall provide training on the OQ RPI PTW procedure, where required.

c) OQ RPI shall make the waste available in IBC tanks and/or steel drums at the designated on-site waste storage facility. OQ RPI shall provide forklift support for loading the waste onto the Contractor's transport vehicle.

8. TECHNICAL EVALUATION CRITERIA:

a) Mandatory Criteria:

- The Bidder shall be approved by the Environmental Authority (EA).
- Bidder shall share at least one relevant experience from the last five years (Not before 2021).
- Bidder shall own and operate the proposed recycling, recovery and/or reuse facility and demonstrate that all key recycling, recovery and/or reuse activities are performed under its direct control.
- As a Medium & High HSE Risk Contracts: Only tenderers who score above 75% in the HSE evaluation will be qualified.

b) Technical evaluation criteria:

Sr. #	Definition	Score
1	**Conformance with the requirement as per SOW**	40
2	**Bidder Technical Capability & Experience**	20
3	**Oligomer waste recycling, recovery and/or reuse completion confirmation for in alignment with Scope of Work**	20
4	**Provision of recycling, recovery and/or reuse methodology details**	20

9. CONTRACT PERIOD:

The call-off contract is valid for 3 years but no guarantee of full call-off services.

10. INVOICING AND PAYMENT:

The Contractor shall pay OQ RPI for the collected oligomer waste in accordance with the rates quoted in the table below.

Sr. no.	Waste name	Job description	Payable to OQ RPI (OMR/Ton)
1	Oligomer	Recycling, recovery and/or reuse of oligomer waste	To be quoted by Bidder

a) The quoted rate shall be payable to OQ RPI and shall include all costs associated with collection, handling, transportation, recycling, recovery and/or reuse, documentation, regulatory compliance, and any other obligations specified in this scope of work.

b) The quantity of waste for invoicing purposes shall be based on the net weight recorded at OQ RPI's weighbridge at the time of collection.

c) OQ RPI shall issue an invoice based on the actual quantity of waste collected and the applicable rate specified in this contract.

d) Contractor shall make full payment of the invoiced amount within seven (7) calendar days from the invoice date.

e) Failure to make payment within the specified period may result in suspension of further waste collections and/or other remedies available to OQ RPI under this contract.
